We are not satisfied with clinical work.
Hope to develop academic knowledge and careers!

**Introduction**
We cope with intractable diseases of the ear, nose, throat, and related structures of the head & neck. We take care of patients of all age groups from neonates to the elderly using medical and surgical approaches. Also, aim to improve the clinical outcomes by basic studies.

**Research field**
1) Olfactory regeneration
2) Mechanisms of allergy
3) Pathogenesis of otitis media
4) Carcinogenesis of head & neck cancer
5) Inner ear biology

**Recent activities**
2) MACC1 expression is an indicator of recurrence in early-stage glottic cancer. Jpn J Clin Oncol. 2020;50:392-398.
