Staff

**Professor** Noritaka Ariyoshi, PhD

**Associate Professor** Masachika Fujiyoshi, PhD

**Assistant Professor** Jun Matsumoto, PhD

Current Research

- Clinical study on an individualization approach to prevent onset of lifestyle-related diseases
- Clinical trials to clarify efficiency of various functional foods and susceptibility of individual in real world
- Study on individual optimization of antiepileptic drugs using biomarkers
- Developmental study of blood concentration measurement of sleep inducer drugs using simple method
- Study on individual optimization of cancer treatment based on expression levels of protein controlling pharmacokinetics
