Department of Otolaryngology-Head & Neck Surgery
Division of "Science of Functional Recovery and Reconstruction"

We are not satisfied with only clinical practice and aim at the future of academic science!

Introduction
We always cope with intractable diseases of the ear, nose, throat, and related structures of the head & neck from newborns to the elderly via medical and surgical approaches based on identifiable evidence and confident experience.

Research fields
1) Olfactory regeneration
2) Mechanisms of allergy
3) Pathogenesis of secretory otitis media
4) Carcinogenesis of head & neck cancer
5) Inner ear biology
