

# Plastic and Reconstructive Surgery

Department of Plastic and Reconstructive Surgery at Okayama University provides various types of reconstructive surgery and treatment of lymphedema using microsurgical technique, in addition, sex reassignment surgery, and craniofacial surgery, etc. And all of them are performed based on the wide experience of general plastic surgery.

At the Microvascular Research Center established in 2005, we conduct the vascular anastomosis training program for every person who is interested in microsurgery.

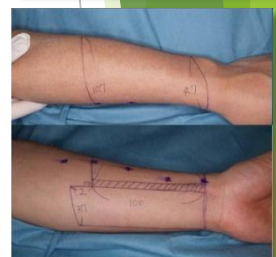

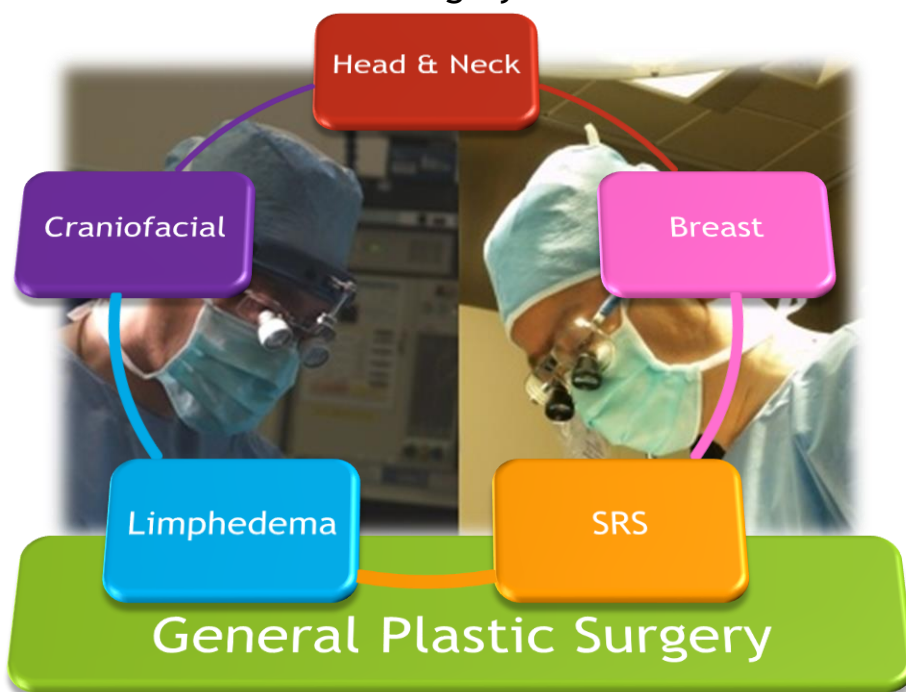

Yoshihiro Kimata, M.D., Ph. D.

Our Department include:

- Head and Neck Reconstruction Team
- Breast Reconstruction Team
- Sex Reassignment Surgery (SRS) Team
- Lymphedema treatment Team
- Craniofacial Surgery Team
