

# Department of Radiology

OKAYAMA University Graduate School of Medicine,  
Dentistry and Pharmaceutical Sciences,  
Biopathological Science, Tumor Biology.

## Power of Dreams !!!

Making our dreams come true with us

Prof.  
Susumu  
Kanazawa

Our department was established as **the first radiology department in Chugoku and Shikoku regions in 1946**. We conduct clinical research in all areas of radiology, including basic radiological diagnosis, radiation therapy, nuclear medicine and interventional radiology. Special emphasis is placed on both basic and clinical research on radiofrequency ablation for malignant tumors in the lung, and we now leads the world in the field.

Our goal is to encourage the young radiologists to augment their clinical and research skills at the same time. We believe that the **"Clinical Specialist Course"** of Okayama Graduate school, which provides you the chance to acquire a doctor's degree through research while also preparing toward a radiology specialist, is one of the best educational programs to achieve that goal.

We also have **"Radiotherapist Course"** which is a part of "Cancer expert training program in Chugoku and Shikoku regions". This innovative course provides well-organized supporting system for the members who wants to be an experienced radiotherapist. We hope you enjoy learning more about the dedicated faculty and staffs who continue to push the frontiers of clinical care and research !!

### IR

Lung RFA  
Cryoablation  
New IR device

### Radiation

IMRT  
SRT  
Proton beam

### Nuclear medicine

PET/CT  
SPECT

### Diagnostic Radiology

Ultra HRCT  
MRI  
Imaging Network

### Graduate School

Clinical special course  
Radiotherapist course

1. Education along the guideline made by JRS, JASTRO
2. Lecture for Clinical research; statistics, epidemiology, methodology
3. Operate Clinical research and presentation under coaching by specialists

**Specialists**  
JRS  
JASTRO

**MD**

Promote  
Instructive  
Clinician
